## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Fischer et al. (US 6,659,355; hereinafter "Fischer").

at least one additional component (electronic components); and

an intermediate carrier (8 in figs. 2-3 having strip conductors by metallic contact surfaces 7, which serves as conductor track structure (as set forth in claim 2), to connect the chip module 2, the display 3 and the keypad 4; see col. 2, lines 10-14) forming a functional component of the keypad and serving as a carrier for the additional component;

the keypad being accessible from outside of the module and from outside of the card body (see figs. 1-3; and col. 1, line 65 through col. 4, line 6).

Re claims 3 and 7: Fischer teaches a chip card module, wherein the keypad has a covering sheet (12, 14 in figs. 2-3) disposed at a surface of the card body and a switch sheet (7, 9 in fig. 2) contact-connected to the intermediate carrier (8 in figs. 2-3).
